► Hier haben Sie die Möglichkeit, Kommentare, Kritik oder Hinweise abzugeben. / Here you got the possibility to write down comments, criticism or hints.

🗨 Total Responses: 4

Username	Answer
Guest	The lecture structure was well-thought out and especially the focus on the performance/complexity/applicability of different algorithms is nice to know for later practical implementations. The exercise summaries were also very helpful to get a good overview over the topics!
Guest	Nice lecture which is well suited to extend knowledge from other DSS lectures (like ML and ADSP).
Guest	Best teacher! I really like his teaching style! He gives very good examples!
Guest	The variety of fields from which examples are chosen could be broader (mostly speech/hands-free telecommunication). This might lead to an expanded 'feel' for possible or already common applications. (This is already done to some extent but the longer examples were mostly similar)
